## Penetration Testing | VAPT | Security Research

Panchkula, Haryana | +91 XXXXXXXXXX | chanaliyatanu786@gmail.com | LinkedIn | GitHub | TryHackMe

### SUMMARY

---

Cybersecurity professional with hands-on experience in web application penetration testing and Vulnerability Assessment and Penetration Testing (VAPT). Skilled in reconnaissance, enumeration, manual security testing, vulnerability validation, security documentation, and offensive security methodologies. Proficient with Burp Suite, Nmap, Nessus, Acunetix, Metasploit, Wireshark, Dirb, Gobuster, and related security testing tools.

### TECHNICAL SKILLS

---

Web Application VAPT | Web Penetration Testing | OWASP Top 10 Security Testing | Vulnerability Assessment & Exploitation

Network Security & Traffic Analysis | Manual Vulnerability Validation | Security Testing | Security Documentation

**Tools:** Burp Suite, Nessus, Acunetix, Metasploit Framework, Nmap, SQLmap, Nikto, Wireshark, Dirb, Gobuster

**Programming & Scripting:** Python, C, C++, HTML, CSS, JavaScript

### EXPERIENCE

---

#### Penetration Tester Intern

*The Drop Organization*

- Performed web application penetration testing and VAPT in controlled environments, including reconnaissance, enumeration, manual security testing, and vulnerability validation.
- Used Burp Suite, Wappalyzer, and supporting security tools to assess application attack surfaces, inspect HTTP requests, and validate security weaknesses.
- Documented security findings with evidence, impact assessment, and remediation guidance.

### EDUCATION

---

#### Master of Computer Applications (MCA)

IK Gujral Punjab Technical University (PTU)

Nov 2023 – Nov 2025

#### Bachelor of Computer Applications (BCA)

Kurukshetra University, Haryana

Dec 2020 – May 2022

### CERTIFICATIONS

---

- DCSC (Drop Certified Security Course) – The Drop Organization
- DCAPT (Defronix Certified Advanced Penetration Tester) – Defronix Cyber Security
- DCPS (Defronix Certified Python Specialist)

### PROJECTS

---

#### Personal Cybersecurity Portfolio Website

- Designed and developed a personal cybersecurity portfolio website featuring a terminal-based interface and interactive UI elements.
- Showcases skills, tools, and project work focused on offensive security and red team concepts.
- Built using HTML, CSS, and JavaScript with responsive design principles.

**Live:** <https://Oxtanvexar.pages.dev>

#### Tanvexar – Offensive Security Learning & VAPT Study Platform

*Personal Project | In Progress*

<https://pentest-1t0.pages.dev/>

- Developing a personal cybersecurity learning platform focused on **Web Security, Networking, Linux, Reconnaissance, Vulnerabilities, Tools and Labs**.
- Organizing practical VAPT concepts, methodology, lab exercises, and security notes into a structured learning resource.
- Integrating hands-on learning resources and project documentation to support practical **penetration testing and red-team fundamentals**.
- Currently under active development; **Home page and initial UI structure completed**, with remaining sections planned for implementation.
